De Challenge

Improve your insight in your assets condition with use of best of what technology can provide, independent of make or brand. Combine various systems into one central dashboard. Train your assets operation models to optimize maintenance needs and prevent unscheduled downtime by predicting upcoming possible failures.

De Solution

A dashboard which can be configured to specific or general needs, which is brand independent and can be extended when needed. By using standard configuration, it is operational within days and can be tailored to specific requests if needed.

De Businesscase

Improve your operation by condition overview of your assets in one system. Easy to use for brownfield situations, specific troubleshooting, , etc..

Is general in set-up to ensure quick uptime, but can be configured to specific cases.
