De Challenge

Okay, here's the thing: 40% of container transport on land is empty. At sea it's 20%. Hundreds of Megatons of CO₂ emissions and 25Bn Euro in cost are wasted. This form of global inefficiency has to stop. Right now.

De Solution

We at [4FOLD](https://www.4FOLDcontainers.com) reduce empty transport in the most significant way. With a foldable container that saves up to 37% in costs and CO₂. We are calling all shippers and shipping lines to take responsibility and start saving CO₂ with 4FOLD now

De Businesscase

Imagine the possibilities. Our foldable shipping containers create more room on vessels, docks, trains and trucks. Saving space resulting in up to 37% CO₂ emissions and cost on vessels, on road transport, in terminals and on depots.

If a container needs to be transported empty, we fold it in a fast, safe and easy way to a quarter of its volume. It only takes us up to 10 minutes to fold it. Four folded containers become one interconnected bundle that is handled like one container.
