De Challenge

Maintenance challenges of today: 1. Interoperability (disparate, formats and inconsistency) 2. Connectivity (protocols, networks and devices), 3. Security (authentication, authorization and secure transfer), 3. Analytics (insights, business and alarms)

De Solution

We combine the best of Artificial Intelligence and Edge Computing to deliver actionable video and image insights to solve real world problems. Our innovative video analytics platform serves Smart Cities, Retail Automation, Security and Surveillance for both Government and private enterprises. We are based in Singapore with a research and development center in Bangalore India

De Businesscase

Seamless and real-time monitoring, energy & cost savings, minimum asset downtime
