De Challenge

Prevent, prepare and response; how can we quickly and properly tackle an oil spill. We help you keep the seas clean for future generations.

De Solution

Easy to use robust system and ready for action in case of an oil spill: combines a high efficiency with a high capacity, operates in rough weather, floats independently, unique oil/water sensor, easy to clean. Part of our total solution with oil spill response planning, asset management and training.

De Businesscase

The value proposition is simple: lower clean up cost and less damage to the environment.
