## De Challenge

Prevent, prepare and response; how can we quickly and properly tackle an oil spill. We help you keep the seas clean for future generations.

## De Solution

Easy to use robust system and ready for action in case of an oil spill: combines a high efficiency with a high capacity, operates in rough weather, floats independently, unique oil/water sensor, easy to clean. Part of our total solution with oil spill response planning, asset management and training.

## De Businesscase

The value proposition is simple: lower clean up cost and less damage to the environment.
